PROFILE

Aviation mechanic with two years of experience maintaining and repairing aircraft, ensuring safety and efficiency. Skilled in diagnostics and troubleshooting, adept with tools and technology. Committed to high standards and continuous learning in dynamic environments.

EMPLOYMENT HISTORY

● Senior Aviation Mechanic at Boeing, NH

Apr 2025 - Present

- Spearheaded the maintenance of over 50 commercial aircraft annually, ensuring compliance with FAA regulations and reducing downtime by 15%.
- Led a team of 10 junior mechanics, improving efficiency in repair processes and achieving a record high on-time maintenance completion rate.
- Diagnosed complex mechanical failures using advanced diagnostic tools, resulting in a 20% decrease in troubleshooting time.
- Implemented a new parts inventory system, cutting unnecessary expenditures by \$200,000 annually through optimized resource management.
- Developed and conducted technical training workshops for new hires, elevating team proficiency levels and decreasing onboarding time by 25%.

● Junior Aviation Mechanic at Airbus, NH

Mar 2023 - Mar 2025

- Diagnosed and repaired over 150 aircraft systems, reducing downtime by 20% through efficient troubleshooting techniques.
- Collaborated with senior mechanics to overhaul engine components, enhancing team productivity by completing tasks ahead of schedule.
- Implemented a new inventory tracking system that decreased part retrieval time by 30%, improving maintenance workflow efficiency.
- Conducted routine safety inspections on Airbus A320 models, ensuring compliance with aviation regulations and contributing to a spotless safety record.
