

Natina Kanesh

Database Administrator

Profile

Driven Database Administrator with 2 years of hands-on experience. Skilled in optimizing performance and managing complex data. Eager to learn and adapt, continuously enhancing skills to tackle new challenges. Passionate about ensuring data integrity and security.

Employment History

Junior Database Administrator at Oracle, IA

Apr 2025 - Present

- Optimized database performance by implementing indexing strategies, reducing query execution time by 15% and enhancing user experience across multiple departments.
- Collaborated with senior administrators on a data migration project, successfully transferring over 500GB of legacy data to new systems within three months while ensuring zero data loss.
- Developed and maintained automated backup scripts, increasing backup reliability from 85% to 98%, thus safeguarding critical enterprise information.

Database Technician at Microsoft, IA

Mar 2023 - Mar 2025

- Spearheaded optimization of SQL queries, reducing database response time by 37%, enhancing system performance and user experience.
- Collaborated with cross-functional teams to implement a new data backup solution, achieving a 99.9% data recovery success rate during testing phases.
- Developed and executed training workshops for junior technicians, fostering a culture of continuous learning and increasing team efficiency by 20%.
- Analyzed complex datasets to identify trends, contributing actionable insights that informed strategic business decisions and improved operational processes.
