PROFILE

Detail-oriented Database Administrator with 3 years of hands-on experience in managing, optimizing, and securing databases. Proven track record of enhancing system efficiency and ensuring data integrity. Skilled in SQL, performance tuning, and disaster recovery strategies.

EMPLOYMENT HISTORY

● Junior Database Administrator at Oracle, AZ

Jun 2025 - Present

- Optimized database performance by 18% through the implementation of advanced indexing strategies and query optimization techniques.
- Collaborated with a team of five to successfully migrate over 200 databases to Oracle Cloud Infrastructure, reducing operational costs by 22%.
- Developed and implemented a backup and recovery strategy that improved data restoration time by 35%, ensuring minimal downtime during critical operations.
- Automated routine maintenance tasks using PL/SQL scripts, decreasing manual workload by approximately 40 hours monthly for the database team.
- Led a cross-functional project to integrate new security protocols, enhancing data protection measures and achieving compliance with industry standards two months ahead of schedule.

● Database Support Specialist at Microsoft, AZ

May 2022 - May 2025

- Spearheaded a database optimization project, reducing query response times by 37% and enhancing system efficiency for over 500 users.
- Collaborated with cross-functional teams to implement security protocols, resulting in a 25% decrease in data breach incidents within the first year.
- Led a team of five in upgrading legacy systems, achieving a seamless transition with zero downtime over a three-month period.
- Developed automated reporting tools that improved data accuracy by 15%, enabling stakeholders to make faster, informed decisions.
