Cambridge, MA

Web Developer with three years of experience delivering robust, user-centric websites. Proven track record in enhancing site performance and functionality. Skilled in HTML, CSS, JavaScript, and responsive design. Committed to crafting seamless digital experiences.

Junior Web Developer at Google, MA

Mar 2025 - Present

- Spearheaded the redesign of Google's internal dashboard, enhancing user interface, which led to a 27% increase in employee engagement and reduced task completion time by 15%.
- Collaborated with cross-functional teams to develop a new feature for Google Search, improving search accuracy by 8% and boosting user satisfaction scores.
- Optimized front-end code for the Google Ads platform, decreasing page load times by 22% and contributing to an overall rise in ad click-through rates.
- Led a project on accessibility improvements across multiple Google services, resulting in compliance with WCAG standards and expanding accessibility for over 100,000 users globally.

Web Development Intern at Microsoft, MA

Feb 2022 - Feb 2025

- Developed a dynamic web application feature that improved user engagement by 22%, collaborating closely with the design and UX teams to ensure seamless integration.
- Optimized backend processes, reducing server response time by 30% through efficient code refactoring and database indexing strategies.
- Led a team of three interns in the successful migration of legacy systems to cloud-based solutions, enhancing system reliability and scalability by 40%.
- Implemented automated testing protocols that decreased bug reports by 18%, streamlining quality assurance efforts and improving overall product stability.
